

WAFFLE SLAB FORMS

MFG CONSTRUCTION & WATER PRODUCTS

Integrated innovation in fiberglass reinforced plastics

Made in the USA

WAFFLE SLAB FORMS

- « Produce a very aesthetically pleasing finish
- « Very easy to use and light weight
- « Can be used on slopes, tunnels, and any design that has heavy loading on floors with a wide span between columns
- « Can be re-used many times with the proper handling and a form release designed for fiberglass which results in a very economical system to use
- « Are designed for structures with the requirement of seismic conditions
- « Can be made in any custom shape or size
- « Forms maintain their shape, will not bend, corrode or rust like other systems
- « Produces various depths, void sizes, and joist widths, using our standard forms for rental or sale
- « Using the forms allows for high void out of allot of concrete which produces increased savings
- « Are perfect for use in chip fabricating, food and beverage and large structure type buildings, garages, libraries and hospitals

Standard sizes for rental are available and custom sizes and shapes are manufactured in our ISO9001 certified manufacturing facility.

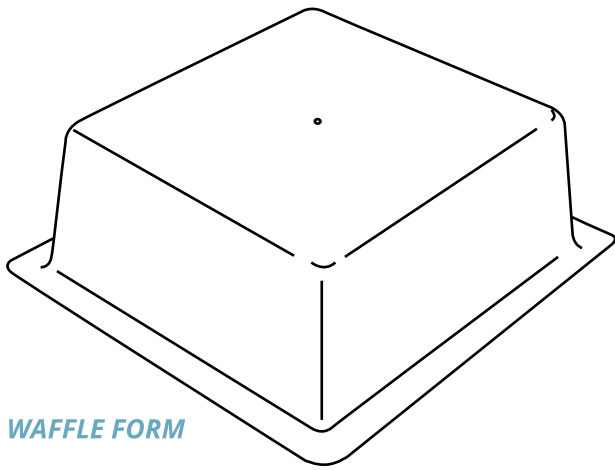

BEAM & SLAB FORMS

Beam and slab forms can be placed by flying in for entire floors at a time. By the means of flying in a complete grid format the process will help offset high materials and labor for the project. Beam and slab form features;

- « Allows greater freedom of design
- « Unusual textures and designs can be molded into the form
- « It allows the contractor to pour structural and finished concrete
- « Because sections can be joined on the job site in such a way so as to eliminate joints, there is no size limitation
- « If properly handled, a number of reuses are possible making it highly economical
- « It is lightweight and easily stripped

Custom sizes and shapes are manufactured in our ISO9001 certified manufacturing facility.

WAFFLE FORM

CUSTOM PRODUCTS

Our custom molded products are from low pressure contact molds or our proprietary steel molds and dies. Products include custom concrete forms for columns, wall liners, staircases, ceilings, bridges and walkways just to name a few.

COMPANY OVERVIEW

MFG has established the largest full-service network of composite molding factories in North America.

Our network is supported by a shared foundation of engineering, design, R&D, procurement and program management that ensures consistent quality and service company-wide. This structure allows us to provide the most competitive cost structure possible.

If JIT delivery or transportation costs are critical to your success, call us to learn more about how leveraging our regional network can improve your competitive edge.

Please feel free to contact us with any questions on our standard products or custom. We would be happy to work with you to provide technical assistance or quotes.

One of our representatives can assist you at the following contact numbers or email addresses.
